If you own Acer Aspire V5 Laptop and it has screen display problem occurring always and you wish to find the possible chances. Here is it.

This may be due to loose connection of the ribbon cable connected to pushes through sockets. I case this might be the problem fixing the loose connection help laptop screen recovered. Else you have to replace it.

How to replace?

First you may require Cross screw driver, Plastic Guitar Picks for replacement of the Acer Laptop Screen. Then shut down the laptop power by removing the battery and unplugging it from the power source because the small electronics might burn while replacing it with other screen matrix. Unscrew all the sides of the laptop screen frame cover. Use plastic guitar picks to detach the cover from the snaps with proper care to prevent breakage. After removing the cover, unscrew the matrix from the laptop by disconnecting from the ribbon cables.

Buy new Acer Laptop Screen from Authorized dealers at best price quotes using Yellow Pages. Take out the new screen matrix and replace it on the laptop by connecting it with ribbon cables. Place the matrix properly in its position and screw them up. Snap the frame cover back and attach them accurately. This procedure may be accurate for Acer Aspire Model V5. While considering other models it may differ. If you are not clear on disassembling techniques please prefer **Authorized Service Center**.
