

Tips on How to overcome Computer Monitor Repairs:

Everyone is in hurry today; Computers have made human life busy by automating their daily tasks and made them concentrate on multiple activities at one time. Without computers he can't manage his day to day work functions that much easily. If computer failed to operate, their strategic plan for that particular day may delay or end up unsuccessfully.

Here are some tips if your computer monitor do not turn on and simply shows a blank **dark screen**. Nothing to worry, the possible chances for the problem may be:

- Power Cable Connection
- Ups Short Circuiting
- VGA Cables
- Video Card

Find [CRT Monitor Repairs](http://humphreykimathi.blogspot.com) Specialist in India providing services with quality and timely manner from Sulekha.

How to check:

First Check whether all the **power cables** to monitor is plugged in properly. If not plug it properly.

If plugged properly, Remove the Power cable from your UPS and verify it by **plugged in** on to the wall socket. Ensure the Surge protector is working or not. If not replace it and try.

If monitor turned on when using **wall socket** your UPS may be short circuited. Replace new UPS.

UPS is working fine but your monitor is still remains with blank screen, Check **VGA Cables** connected to monitor properly, tighten the screws. This may fix the problem else the problem is due to Video Card.

Open up the **CPU Case** and Remove the **Video Card** and reinsert carefully and correctly. This may terminate your problem. Else go for Computer repair services or any expert technician.

Find [LCD Monitor Repairs](#) Specialist in India providing services with quality and timely manner from Sulekha.
